

AYESHA FAROOQ

Computer Science Student | Front-End Developer | Graphic Designer

Maddo Khalwan, Pakistan · 0327-9797993 · ayesha.farooq.cs93@gmail.com · [GitHub](#) · [LinkedIn](#)

OBJECTIVE

Computer Science undergraduate with a growing focus on front-end development and applied machine learning. Interested in building clean, usable interfaces and practical ML projects, with the goal of pursuing graduate studies abroad.

EDUCATION

Bachelor of Science in Computer Science

2023 – Present

University of Narowal, Pakistan

F.Sc. Pre-Engineering

2021 – 2023

TECHNICAL SKILLS

- Programming: Python, JavaScript
- Web Development: HTML5, CSS3 (animations & layouts), Bootstrap
- Data Science / ML: Pandas, Scikit-learn, data cleaning, exploratory data analysis
- Tools: Git, GitHub, VS Code, Canva

PROJECTS

Brain Tumor Classification

- Built a Random Forest classifier in Python to detect brain tumors from a medical imaging dataset. Identified and corrected data leakage issues in the original pipeline to ensure reliable evaluation results.

Podcast Platform UI (NSoC'26 Open-Source Project)

- Built a dashboard interface with custom CSS grids, glassmorphism styling, and animations as an open-source contribution.
- Live demo: [openxstudio.vercel.app](#)

Predicting Student Health Risk — Kaggle Playground Series (S6E7)

- Built and submitted a predictive model to classify student health risk levels; achieved a public leaderboard score of 0.90324.
- [github.com/ayesha-cs-93/student-health-risk-prediction](#)

EXPERIENCE

Intern — Fly Rank

Currently awaiting first task assignment

- Selected for the internship program ([internship.flyrank.ai](#)).

Open Source Contributor

NSoC'26

- Contributed to an open-source web project, resolving folder structure and configuration issues.

Freelance Graphic Design & Web Basics

Self-directed

- Designed social media posts, logos, and posters for personal and freelance clients using Canva.
- Built beginner HTML/CSS projects while learning front-end development.
